

“Ultra compostable™” exists since 2020. So what does it mean to be “Ultra compostable™”? It means that the products are 100% natural, 100% chemical free, 100% paper free & 100% plastic free. In addition to this, these products can also be converted into green energy, thereby outperforming all existing compostable products on the market. Our “Ultra compostable™” products degrade naturally in soil and water in less than 50 days. There is no need to sort your waste after consumption. You can throw them in your conventional organic waste or simply toss them in your backyard.

**Compostable:**

- Decomposes but it is not clear when.
- Often contains bioplastic and therefore cannot compost under normal conditions.
- Can contain chemicals.
- Often mistreated and thus the logo can no longer be trusted

**Ultra compostable:**

- Decomposes in less than 50 days.
- 100 % chemical free and therefore can be disposed in conventional organic waste or in the garden.
- 100% natural ingredients
- 100% honest and must meet strict conditions

It is only “Ultra compostable™” when it is 100%

and if it can be converted into
